| | | | |
|----------------------------|---|-----------------------|---|
| Languages: | TypeScript, JavaScript, PHP, Python, C# | Frontend: | React, React Native, Expo |
| Backend: | Node.js, Express, NestJS, Laravel, .NET | Databases: | MySQL, PostgreSQL, MongoDB |
| Tools & DevOps: | Docker, Git, GitHub, Linux, Postman | Methodologies: | Clean Architecture, SOLID, REST, Domain-Driven Design |

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer 2023 – Present

Team 360 Staffing

- Led architecture and delivery of enterprise-grade web applications, reducing time-to-production on critical features by coordinating cross-functional teams.
- Mentored junior and mid-level developers through code reviews and pair programming, improving team code-quality standards.
- Integrated modern frontend (React, TypeScript) and backend (.NET, Node.js) stacks across multiple simultaneous client projects.

Stack: TypeScript · Node.js · React · .NET / C#

Tech Lead 2022 – 2023

Extiblu

- Directed technical development of SaaS products, defining architecture, patterns, and release processes for a team of 6 developers.
- Translated business requirements into actionable engineering plans, bridging product and engineering to consistently meet delivery deadlines.
- Established coding standards and code-review workflows that reduced production bug rate.

Stack: Laravel · PHP · React · MySQL · Docker

Full-Stack Developer (Junior → Mid → Senior) 2020 – 2022

Extiblu

- Built pixel-perfect UIs and RESTful APIs for client-facing web products, with a focus on performance and maintainability.
- Progressively adopted SOLID principles, design patterns, and clean architecture as scope and responsibility grew.

- Contributed to the internal shared component library adopted across all company projects.

Stack: JavaScript · TypeScript · React · Node.js · PHP

SELECTED PROJECTS

Pavas Marketplace <https://marketplace.pavas.io/>

Full-Stack · MinIO · i18n

Full-stack e-commerce platform with multi-category catalog, user authentication, favorites, and search. Bilingual ES/EN.

Pavas Finance <https://finance.pavas.io/es/login>

Full-Stack · Auth · i18n

Personal finance web app featuring multi-language support, dashboard, and income/expense tracking with role-based auth.

SaaS API <https://github.com/juanpavasgarzon/saas-api>

Backend · REST · Multi-tenant

Production-ready base API for multi-tenant SaaS products, covering auth, user management, and scalable data isolation.
